

Khorasan Razavi has the second highest quality flour in the country

The provinces of Tehran, Khorasan Razavi, Khuzestan, Fars and Golestan are the provinces with the highest production of wheat.

Hamid Reza Nouri said: In the framework of planning, ranking and improving the quality of production in the flour mills of the province is on the agenda and flour and bread production as a key element of food security in the community is a priority for planning so in this province also for production. Good wheat, fine flour, and quality bread have made all the effort. The Director General of the Fifth Region's Grain and Commerce Service noted that this year, with a 51% increase over the same period last year, 501,000 tonnes of surplus wheat were guaranteed. Khorasan Razavi farmers bought it said: Fortunately now the reserve

He said: "We are now preparing the necessary areas for preparation for a guaranteed purchase next year."

The grain and commercial services company in the region of five countries imports, purchases, supplies, supplies, maintains, stores, prepares, packs, distributes and exports basic, sensitive and essential goods using all the usual economic and purchasing tools, Creates, constructs, operates, leases, leases and maintains essential equipment and storage facilities in Khorasan Razavi, North Khorasan and South Khorasan provinces.
