

Pole of silos industry in the west of the country

Kermanshah Province Director General of grain and commercial services said: This province is the hub of the silos industry in the west of the country .

Mashallah Arvisi, Director General of Kermanshah Province's Grain and Commercial Services, said: "Kermanshah has long been recognized as one of the most needed **wheat production** and supply hubs in the country. With the double efforts of the farmers and the good planning of the authorities, it was able to secure the fifth rank in the country with the guaranteed purchase of over 500,000 tons of surplus wheat on the needs of the farmers.

The official said that with the formation of the silo industry, a standard storage facility was also built by the 49 private sector in Kermanshah province and the total number of storage centers in the province increased to 60 centers in two public and private sectors.

With the construction of new silos in the public and private sectors, the storage capacity of the province has increased to over one million four hundred and fifty thousand tons, according to Arvisi. .
