

# The Commissioning of 13 Grain Suction Machines

13 grains suction machines and gantry cranes were used in Shahid Beheshti port of Chabahar .

At the presence of the Minister of Roads and Urban Development in the Chabahar port, eight grain suction machines and five cranes were launched to the coast.

The producing countries of these suction machines are Germany and Iran. These eight machines have a capacity of 600 tons per hour.

Five sea-to-coast cranes were also launched on the coast, with a capacity of 80 to 140 thousand tons.

With the arrival of these grain suckers, 20,000 tons of grains daily are discharged and loaded at Shahid Beheshti Chabahar Port.

The port of Chabahar supplies 20% of the basic goods needed in the east and south-east of the country.

The Indian company has invested \$ 85 million in supplying Chabahar port equipment, with an operating life of 10 years.
